

DON'T

Trucks release salt and sand from the back of the truck - if you're too close to the truck, materials could hit your windshield & obstruct visibility.

BLIND SPOT

Plow trucks travel between 25-35 MPH

Allow enough time & space to safely stop/slow down.

BLIND SPOT

Crowd the Plow!

NEVER PASS Plow on the RIGHT

Plows push snow to right shoulder & may use a wing (often 6-8 feet long) which is difficult to see.

Don't assume the plow driver can see your vehicle.
The driver's field of vision is limited
You may see them, but they may not see you.

Maintain at least 200-foot distance from plow truck to:

1. ensure the driver can see you at all times
2. allow time for you to slow down or stop
3. avoid obstructing visibility from material release or cloud of snow

Remember: Plow trucks may need to "back up" at intersections during storm response - make sure to leave them room to do so.
